About This Content

Greetings, BEST FRIENDS. The Tywom - and other exciting alien species from the Star Control®: Origins™ universe - have come to Galactic Civilizations III! Each alien race brings a new depth of play with unique leaders, ship designs, traits, music and more.

The Star Control Heroes DLC pack introduces the Tywom, Mowlings, Mu'Kay, and Free Trandals into Galactic Civilizations III. All of the new major alien factions come equipped with a unique leader, ship designs, music, and traits that make sense for that race.

Here are the new races you'll be able to play with in Star Control: Heroes:

Major Factions

- Tywom - Hello, best friends! These yellow slug-like aliens would like a hug. They're slimy, and you don't want to give them one, but still - it's all they really want. The Tywom want to be friends with everyone, which makes them great diplomats, and their constant desire for approval gives them a bonus for any other factions who happen to love them.
- Mowlings - All hail the mighty Jeff! The Mowlings are small, bear-like creatures who worship a mysterious deity they call Jeff. Frankly, they're a little lost without him, so they spend their time finding new ways to worship him. The Mowlings get a special Temple of Jeff improvement (one per planet) that grants bonuses to influence and approval, and in return Jeff orbits their planets protectively.

-
- Mu'Kay - Greetings, federation member! Founders of the Federation for Allied Species, the Mu'Kay are intelligent cephalopods who live entirely in aquatic environments. Their natural intelligence makes them excellent researchers, and their polite (if occasionally condescending) manner lends itself well to diplomacy. Unless you're a fish. Then prepare to be eaten.
 - Free Trandals - Cast off the shackles! The Free Trandals are the escaped faction of a race that has been enslaved by a malevolent AI known only as Overmind, who uses their bodies to advance its own nefarious purposes. Now, the Free Trandals work to free their brethren and rebuild their lost culture with what little they have left. Possessing a surprising capability (and healthy paranoia) for advanced technology, the Free Trandals are far from helpless both on and off the battlefield. Their warrior instincts may be long buried, but their ships, while few in number, are enormously effective against silicon and synthetic based life forms.

Features

- 4 new major factions with unique leaders, ship designs, music, and traits

Really lovely train! I give it a 10/10.

(Feel free to add me as a friend). German: Viel zu wenig Umfang. Spielt sich immer noch mehr wie eine Alpha.
English: Too less content. Feels more like alpha then a full game .. Excellent game for the price! It's a fun simple space adventure with a relatively entertaining story behind it.

My only issue was with how slow flying across the galaxy became towards the end. It was rather tedious that none of the higher level ships were very fast and the quests tended to send you back and forth across the whole system.. Nice puzzle game. Looking forward to more of these :). Well thought out satire with multiple levels of nuanced meaning. Very playble game with sophisticated graphics and physics. Not only is the punching mechanic well implemented, the♥♥♥♥♥♥♥♥physics are nicely done and even the mannequin has well done squash and reactionary movements. The jaw in particular has the ability to stretch open and accept even the biggest♥♥♥♥♥♥♥♥ I must say I was very impressed.

And hitting Trump with a♥♥♥♥♥♥♥♥is just fun.. If you were ever unpopular enough with members of the opposite sex to explore the wonderous world of Visual Novels, rejoice! Now, you can play the VN known as Army Gals, where not only are you unpopular enough with woman that being the only male around still doesn't make you desireable, but you also have to survive a journey through the wilderness with a potential murderer in your group .

Pros:

- An uncensored patch is available to the game (for free)
- Multipler ways to kill yourself, giving the game a lot of replayability
- Steam achievements, so you can "achieve" something while you sit on this game and disappoint your parents
- The girls are okayish

Cons:

- The game actually has like this kinda complex methodology to earning love points with the girls
- The love points aren't obvious when you earn them

. A very nice adaptation of the Heroes of Normandie bordgame.

Gameplay (4/5)

- Mechanics are simple, yet there is room for tactics. Being a boardgame adaptation, everything is quite transparent and clear, and the interface does a good job of explaining all the different modifiers and special rules.
- Battles are quite quick, playing a scenario will take around 15 - 20 minutes. This is ideal for people who don't have much time to play.
- The game relies a lot on dice rolling. Of course part of the fun is tipping the odds to your favor, but there is the occasional

strike of good or bad luck. Anyway, good tactics almost always trump luck (don't listen to the whiners :D).

- Some board game mechanics have not been implemented the game. Cards are missing, and some unit special abilities, though still shown on the counters in the game, apparently are not implemented.
- Content is plenty: 6 story campaigns (one is a tutorial), 2 hardcore-mode campaigns, skirmish scenarios, and multiplayer.

Technical aspects (3/5)

- Technically speaking the game is not top notch, but the graphics and sound are pleasant.
- I have had an occasional crash, and the interface is sometimes slightly glitchy.

Art (3/5)

- The art of the game is quite pretty, taken directly from the board game.
- The atmosphere is slightly humorous, and doesn't take itself too seriously.
- Sound and graphic effects are quite simple, but they do their job.
- The music is a bit generic.

Conclusion

If you like light wargames and boardgames, definitely consider playing Heroes of Normandie.

Too many things that annoy me. Starting from me always having to change the options twice because I get an error the first time over the game being in automatic skip mode so even if I wanted to read the story I couldn't because the text vanishes too quickly to the worst annoyance: not being able to disable the sound. I can switch the music off (which also only disables it in the shop overview. Go to the girl clicking minigame and it's there again) but there is no way to stop the moaning. Yeah, I want the entire neighborhood to know what kinda game I'm playing, thanks.

These are all basic functionalities a game should have. This one doesn't.. The movement on the game is nice, you can run and accelerate and even jump While going around the island you're able to collect seashells or apples, animals and books to power up your knowledge.. If you can get this DLC at a sale for less than 10 bucks, get it.

- + New race is fun
- + ...which also comes with absolutely great description texts
- + Some new Campaign with its skirmish levels

For full price (currently 15\20ac), however I think this is overpriced.

The race can be seen during the campaign, so some stuff (if not all?) was essentially already in there.

The new campaign levels are gone fast, too. As skirmish levels they are okayish, too, but I feel the Undead share the same "problem" as the Deamons: hard at the beginning, as the tank creature needs the forge-like room first. Afterwards pretty easy to beat the level, too.

TL;DR

Grab on sale for all Dungeon fans but think about it twice the rest of the time.. I bought the game originally for the artwork & the fact that it was on sale for very cheap. The gameplay really took away the enjoyment the art reeled us in with. In the end, it became the only time I wish I could remove the game from my library & they keep the change I paid for it.

I tried to like it, the art had been a big pro, but either not enough or too much thought went into the game itself.. I have strong feelings about Beglitched. It appeals to my very core on every level of its design.
